TYPE 1280/1280 HS

TYPE 1320

TYPE 1637/1638 HS

Performance

- Up to 25.000 mixed post cancellings per hour (theoretically)
- Desktop device
- Sturdy design
- Long service life
- Easy handling
- Extremely reliable
- Low maintenance costs
- High speed (option)

Performance

- Up to 24.000 mixed post cancellings per hour (theoretically)
- Ergonomic work surface
- Z-system feed/discharge
- Handling of inflexible letters (e.g. CDs)
- Very easy to use
- Jam detector

Performance

- Up to 40.000 mixed post cancellings per hour (theoretically)
- Electro-mechanical break/coupling system
- Perforated PU-suction belt for controllable vacuum method
- Optimal separation quality
- Low ink consumption
- Automatic inking system
- Digital counters
- High speed (option)
- PC interface (option)

The principles of our stamp cancelling machines were first developed many years ago in Berlin by company Klüssendorf. The expertise gained in those early years is still going strong and the experience gained is our measure of continued development.

Post Offices all over the world are putting their trust in our technology.

The compact design and a national parts supply network guarantee that our stamp cancelling machines will have a long service life.
